

## **Mighty Oak Technology's Chart Talk Receives ONC-ATCB Certification by Drummond Group**

(4/7/2011—Minneapolis, MN) – Mighty Oak Technology, Inc's Chart Talk for Meaningful Use has received the federal government's "meaningful use" stamp of approval by earning full EHR certification. The designation officially deems the electronic health record (EHR) software capable of enabling providers to qualify for funding under the American Recovery and Reinvestment Act (ARRA). Tested and certified under the Drummond Group's Electronic Health Records Office of the National Coordinator Authorized Testing and Certification Body (ONC-ATCB) program, the EHR software is 2011/2012 compliant in accordance with the criteria adopted by the Secretary of Health and Human Services.

"I am proud of the job my team has done getting Chart Talk fully certified for meaningful use. They have employed intelligence and ingenuity by integrating meaningful use functionality with common sense. I am amazed at the job they have done incorporating speech recognition and creating functionality that has never been attempted by any other clinical software," says Judith Barnes – President of Mighty Oak Technology, Inc.

Drummond Group's ONC-ATCB 2011/2012 certification program tests and certifies that EHRs meet the meaningful use criteria for either eligible provider or hospital technology. In turn, healthcare providers using the EHR systems of certified vendors are qualified to receive federal stimulus monies upon demonstrating meaningful use of the technology -- a key component of the federal government's push to improve clinical care delivery through the adoption and effective use of EHRs by U.S. healthcare providers.

Chart Talk for Meaningful Use, which met the requirements for a fully certified ambulatory EHR, is an EHR that seamlessly incorporates speech recognition technology for documentation. Chart Talk is a versatile EHR that puts meaningful use at your fingertips. The common sense approach used to develop Chart Talk focuses on the spirit of meaningful use while meeting every requirement. Chart Talk provides simple methods to deliver patient education and clinical decisions at the point of care, generate alerts for health conditions, simple dashboards to view clinical quality and meaningful use measures, electronic prescription writing, integration with Microsoft HealthVault and much more.

“The need to leverage information technology in the healthcare industry is huge – as the quality of care and efficiency benefits that come with computerization can really make a difference in the overall patient experience. We’re ready to help transform the industry by providing the sophisticated software testing services that ensure that vendors and hospitals are offering systems that are capable of meeting the meaningful use standards required to obtain incentive funds as well as the rich functionality required to move the clinical care needle forward,” says Rik Drummond, CEO of the Drummond Group. “We have been testing software for more than a decade and are ready to leverage our extensive experience handling sophisticated systems in complex industries as well as dealing with complicated technical issues such as interoperability and security.”

*This Complete EHR is 2011/2012 compliant and has been certified by Drummond Group, an ONC-ATCB approved to certify any complete or modular EHR both ambulatory and inpatient, in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments. Vendor name, Date Certified, Product Version, Certification ID number, Clinical Quality Measures Certified, any additional software relied upon to certify, where applicable the certification criteria to which each EHR modules has been tested and certified.*

#### **About Mighty Oak Technology, Inc.**

Mighty Oak is an HIT company focused on making clinical computing understandable. Our goal is to develop the products and partnerships to assist our clients in creating the workflow they desire. Mighty Oak’s partnership with Dragon® Medical position to train and support clinicians in the most accurate speech recognition technology available. Our staff is fully versed in meaningful use, computer networking, medicare documentation, workflow analysis and the technological health IT know-how typical IT staff is not prepared for. Mighty Oak is your partner in HIT. [www.mightyoakinc.com](http://www.mightyoakinc.com)

#### **About Drummond Group**

Drummond Group Inc., the trusted software test lab, provides effective and efficient electronic health record (EHR) testing to healthcare information technology vendors and hospitals. As an Office of the National Coordinator Authorized Testing and Certification Body (ONC-ATCB), Drummond Group works closely with healthcare software vendors and hospitals to certify EHRs that are looking to qualify for incentive funds under the American Recovery and Reinvestment Act (ARRA). Drummond Group is approved to certify both complete and modular EHR for both ambulatory and inpatient. Leveraging more than a decade’s worth of interoperability, conformance testing and certification experience in multiple industries, Drummond Group delivers what’s needed in healthcare: highly reliable and readily affordable software testing services.
